The buzz

SLEEK STATIONS

Wait in style

Brooklyn, New York-based firm CAZA (Carlos Arnaiz Architects) has designed 19 of the 33 stations in metro Cebu's new Bus Rapid Transit system, with five already built and operational. The stations' structural design is inspired by Cebu's traditional basket-weaving patterns. The stations' roofs not only provide shelter, but also direct rain water into tanks, thus helping to prevent street flooding. The other 14 stations will be completed in 2019.
